

Bingo's Dungeon 2003

Group 42

Brandon Nguyen
Mohammad Tanatra
Yeowon Yoon
Ivan Zimmerman

Introduction

The Concept

- The game is an entertaining game made to deal with boredom. The game has an underlying message against gambling, placing sprites of different suits from a deck of cards as the enemy.

Compelling Concept

- We hoped to make an entertaining and enjoyable combat game, to have a slightly statistically significant impact on childhood gambling if played by a larger sample of kids.

Menu Layout

- Menu contains a button to start playing the game and a button to see the controls.
- Play button will immediately lead to the game screen which
- Control button will immediately lead to the screen with the list of controls.
 - Back button in the controls will allow the user to go back to the menu

Controls/Gameplay

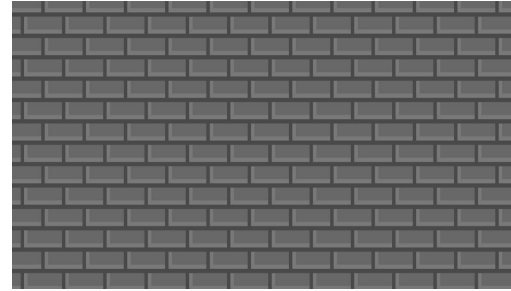

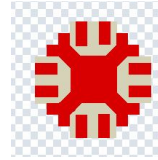

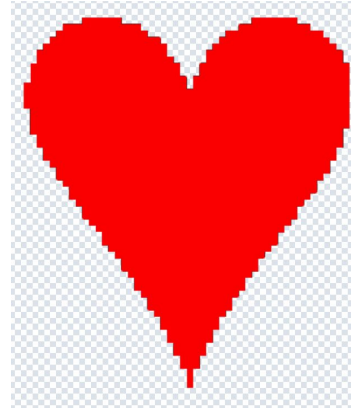

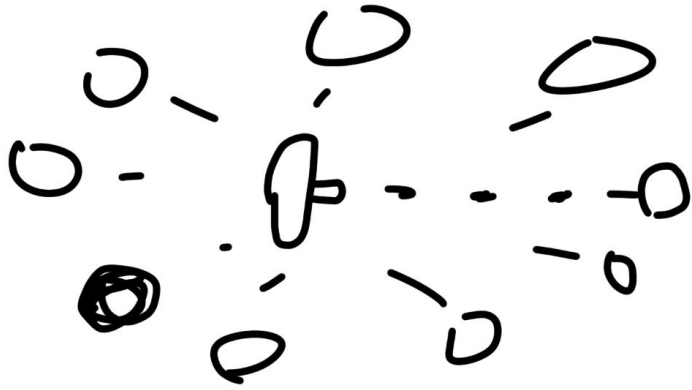

Controls

- WASD movement
- Left click to shoot, mouse to aim
- Spacebar to move to the next stage
- E to activate secondary fire
- Q to activate grapeshot

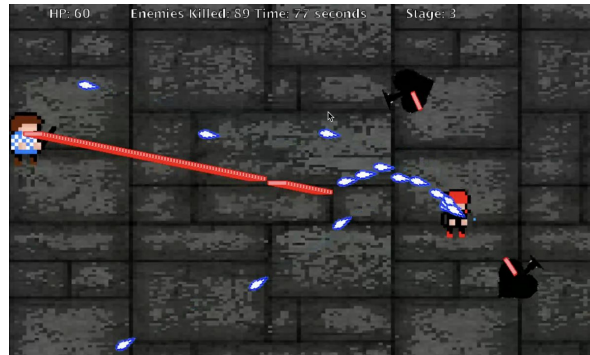

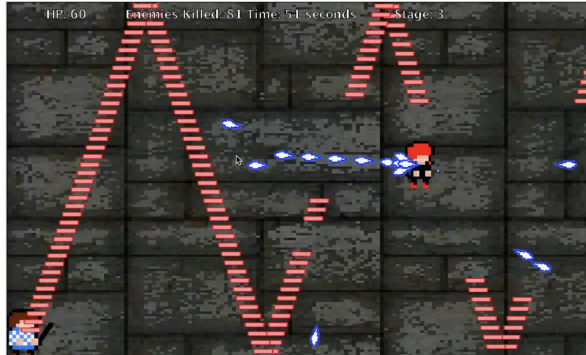

Gameplay

- Progress through 3 stages, with each more difficult than the last
 - Required to destroy a certain number of enemies to progress
 - Ends with a final boss stage
- Within each stage, shoot varying types of enemies

Look and Feel/Graphics

Levels/Difficulty

Sound

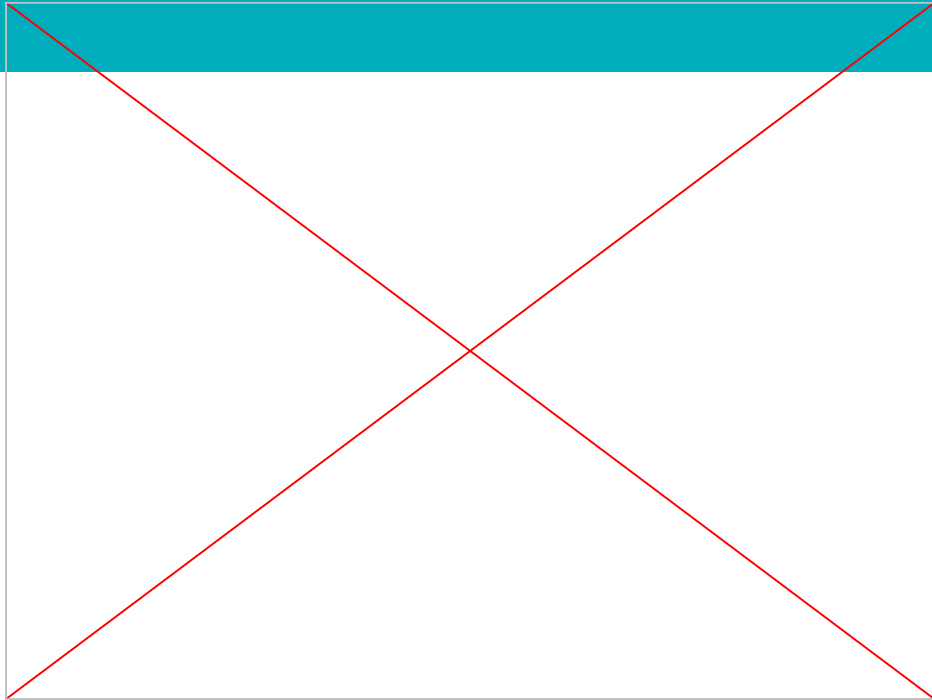

Describe Overall Sound Scape

- Funky
- Metal
- 8 bit

Story supports game play

- Popping combat, progressing to a violent / aggressive metal instrumental to set the tone for a boss fight

Extras/Features

This video showcases all the features of this game.

It shows the basic player movement, enemies movement, and boss movement through gameplay.

It also shows the shooting mechanic, including grapeshot and secondary fire

It also shows the menu screen navigation and space bar navigation

Design

Describe Overall Design Scheme

- The prototype was not reasonable to run on the computer
 - “Bullet hell”
 - However, had a good vision
- Game changed main characters & diluted the amount of projectiles

Story

- Dungeon progressively getting harder
- Reaches a boss at end of dungeon with special mechanics

Future work

- More diverse enemy types
- Developed plot / story line
- Health system and its display

Reflection

- The playtime
- Implementing the music and custom text to the game was difficult, as well as implementing different enemy mechanics.
- We learned the difficulties and challenges that come with working as a group
- For the future we want to work on d
 - diversifying the enemies,
 - fine-tuning the music
 - plot
